

E&P Support

Your Partner For Success

New Digital Business provides subsurface support which ensures the most effective use of your digital technology assets in finding and producing hydrocarbons.

Petrotech Support

We support your data and application support needs with people who have a clear understanding of G&G, Drilling and Engineering tools and best practice

Consulting

What tool? Which datastore? We cover the whole E&P lifecycle. Consulting is not a paper exercise - we ensure that we deliver the promised results too

Project Management

Our experienced and qualified staff, attuned to the language of E&P are better value than cross-sector consultancies

People Development

Training must be considered with tools and process: we complete our offerings by making sure your staff can make best use of the tools

Why New Digital Business is best placed to offer these services:

1. We have extensive industry experience with operators and service companies
2. We are Tri-lingual, speaking 'E&P' and 'IT', translating from 'Business'
3. We focus on how digital technology can improve finding and production
4. We manage projects to time, budget, and quality with our unique CPW¹ and MSD¹ processes for fast and accurate project delivery

¹ see website for detail.

Delivering on the promises of IT
